

Specialist Cloud Services

SERVICE DEFINITION

Transforming data into elegant cloud solutions that deliver value and insight

Let Landmark help, support and add value to your cloud design, transition and operation:

- We provide a wide range of specialist cloud services to support your design, migration, value-add and operation of cloud services
- These services are based on our considerable experience in the design, build and operation of numerous government cloud-based managed services – all of which operate to very high levels of availability and security; and which underpin numerous high profile government services
- We bring the experience of operating a £100m business to business model from our cloud base to support and add value to your business objectives
- Plug into our location-based, geospatial, property and addressing expertise to unlock the visualisation and power of geographic relationships – letting you derive the maximum value from your data

Specialist Cloud Services from Landmark include –

- Transition and on-boarding support
- Data Migration and conversion
- Service management
- Technical architecture and design consultancy
- Business Analysis – ensuring your business vision through cloud-first principles
- Service integration, transition, deployment and Quality Assurance
- Cloud service management using our ‘best execution venue’ model
- CESG secure services to meet your security levels
- Services to international ISO, ITIL and Programme Management standards
- GIS, Mapping, Addressing, location-based and property cloud services/expertise helping you to unlock the power of geographic visualisation and analysis
- Helping you make sense of UK addressing and deriving value from cloud addressing solutions
- Property valuation, survey, planning, financial risk and environmental risk specialisations
- Data migration, conversion, capture, rationalisation, validation and cloud serving
- Cloud service data modelling, geospatial, tabular and statistical analysis
- Training and knowledge transfer

Enabling you to:

- Create elegant solutions that transform the power of your data and deliver value and insight
- Reduce cloud implementation and transition risk using our 'real-world' experience
- Reduce cost and increase flexibility through our 'best execution venue' model
- Unlock the benefit of location, place, property and neighbourhood visualisations
- Navigate the complexities of UK Addressing using our expertise
- Focus on your core business by utilising our service management
- Benefit from our knowledge of data migration, transition and conversion
- Plug in to over 350 geospatial data sets as a service
- Utilise our knowledge of property planning, valuation, financial and environmental risk
- Keep your and your customers' data safe and secure

The complete solution

Our diverse range of specialist cloud services combines with our platform as a service offerings, our geospatial software as a service offerings and our data as a service offerings to provide you with a one-stop shop for cloud based services with a locational element.

Configured to your needs

Look at our individual components in these categories to see how you can configure high quality comprehensive solutions from Landmark's services.

Value for money

Specialist Cloud service pricing is based on the attached SFIA day rates. These can be combined with our SaaS and PaaS pricing models to price up a cost effective end-to-end solution.
